AIMS & SCOPE

The International Journal of Disaster Medicine is the first international journal devoted exclusively to the field of disaster medicine. Practitioners and researchers in healthcare, academia, industry and government around the world will find analyses, ideas, new application of knowledge and discussions of topical issues that will help them enhance efficiency and effectiveness of their policies in disaster medicine.

The International Journal of Disaster Medicine provides the latest experience, research, reviews and debates in the following areas:

- Experiences from major accidents and disasters
- Vulnerability assessment and risk analyses
- Planning and preparedness
- Practical management and organization in major accidents and disasters
- Research within all fields of disaster medicine including:
 - Traumatology
 - Hazardous material
 - Bioterrorism
 - Terror and armed conflicts
 - Extreme temperatures
 - Nuclear medicine
 - Psychological reactions
 - Natural disasters
