TraumaCare

The Official Publication of ITACCS

International Trauma Care

TraumaCare
now available at
www.ITACCS.com

Participants in TraumaCare 2002-Scandinavia were treated to an evening cruise from Stavanger, following Lysefjorden, to Pulpit Rock. During the trip, local emergency crews demonstrated water and air rescue techniques. (Photos courtesy of Joanne Williams, MD, Los Angeles, California, USA.)

► Abstracts - TraumaCare 2002-Scandinavia

This issue contains abstracts from the second half of the 15th ATACCS in Stavanger, Norway. The first set was published in the Fall 2002 issue.

**Some people think
they can ignore the rules...
overstep the boundaries.
Do things their own way.**

**THAT'S HOW OUR BLOOD WARMING
SYSTEMS WERE INVENTED.**

Blood and Fluid Warming.

Nobody does it better.
In the OR, ER and Trauma.
Before Level 1, patient temperatures dropped because of cold blood and room temperature I.V. fluids. Level 1 changed that forever.

Not just lukewarm, but body temperature warm.

Our latest warmer is the **System 1025**. It safely and reliably delivers the

warmest fluids over the widest range of *clinically relevant* flows. To help keep your patients warm.

The innovation goes on.

Level 1 continues to push the envelope with unique and innovative thinking like:

- "Hands-Off" Degassing
- Continuous Arteriovenous Rewarming (CAVR)
- D-60HL: the fool-proof warming set for unpre-

dictable high *and* low flows.

Only from Level 1.

Make sure your patients get tomorrow's thinking in fluid warming today.

System 1025 and HotLine®.

Call us for an evaluation.

1-800-5 LEVEL 1.

We back our innovation with an unconditional 60 day money-back guarantee.

NOBODY ELSE PERFORMS AT THIS LEVEL.
